"They Don't Answer"

SOMETIMES, when a number is asked for on the telephone, the operator reports that the number called does not answer.

Not infrequently the calling party thinks that the operator is to blame, that it is her fault that he fails to get the person called for.

Investigation and experience show that instances in which the operator actually is to blame are rare. In the majority of cases the person called is absent or not near enough to hear the telephone bell. Sometimes the subscriber hears the bell but is slow in answering.

"Don't answer" reports would be greatly reduced if subscribers would be prompt in answering when their bell rings.
